Early Fall Meeting of the New England Society of Microscopy

October 11th 2007, at 1:00PM

At Smith College, Northampton, MA

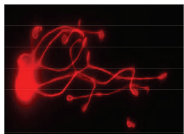

**A regional meeting devoted to microscopy and related techniques,
it brings together a wide variety of disciplines ranging from biological to material
sciences.**

**It also provides excellent networking and collaborations by bringing together
students, professors, academia, and industry in one forum.**

Speakers:

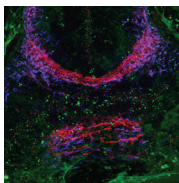

Masaru Tsuchiya, Harvard School of Engineering and Applied Sciences
**"Synthesis and Phase Stability in Nanoscale Electrolytes for Advanced
Solid Oxide Fuel Cells"**

**Sunita Patel-Hett Ph.D., Dept. of Surgery, Brigham and Women's
Hospital, Harvard University**
"Visualization of Cellular Processes Underlying Platelet Formation"

Christopher J. Russo, Harvard Physics Dept., Harvard University
**"Electron and Scanning Probe Microscopy Technologies Applied to
Nanopore DNA Sequencing"**

Michael Barresi, Ph.D., Dept. of Biological Sciences, Smith College
**"Laser Scanning and Structural Confocal Microscopy Uncover Mecha-
nisms of Nervous System Development in Zebrafish."**

Poster Session * Refreshments * Dinner
